Summary

TypeScript engineer and technical founder who builds client software, developer tooling and the systems that ship it. Led NOC operations and infrastructure migrations, and builds agent integrations with explicit access boundaries.

Skills

- TypeScript, Node.js, APIs and MCP integrations
- PostgreSQL, tenant-aware access and OAuth/OIDC
- AWS, Docker, Kubernetes and Linux
- Release automation, health checks and incident recovery

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Build TypeScript and PostgreSQL applications and APIs for clients, including tenant-scoped access and authenticated MCP integrations.
- Build Git-tagged container release workflows with database migrations and service health checks.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Ran NOC operations and led engineering escalations and recovery verification. Built repeatable diagnostics for the on-call team.
- Migrated hosted workloads from Hyper-V and VMware ESXi to Docker and Kubernetes. Ran PHP and JavaScript web services and replaced billing software.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built provisioning automation and a front-desk tool for per-office network access and troubleshooting on custom Linux routing hardware.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Troubleshot business networks and endpoints for managed-services clients using remote monitoring and repeatable diagnostic tools.

Infrastructure and Systems Focal

IBM

2010 - 2012

- Built an internal backup tool to reduce software licensing costs. Automated infrastructure workflows with Perl, Bash, VBA and PHP.

Selected Projects

Kerf | TypeScript developer tooling

Independent project

Early development

- Built an early TypeScript/TSX framework with a compiler, targeted DOM updates and diagnostics designed for developers and coding agents.

ProofMark

Client engineering

Contribution completed

- Designed a document-signing workflow that joins identity, routing, audit history and verification, with explicit fallback paths for security-sensitive state.

Radar sensing infrastructure

Technomancy IT client project

Long - term engagement

- Set up and supported the environments used by ML and data-science engineers developing a contactless radar device. Contributed full-stack engineering and DevOps.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA A+ | CompTIA | Earned

CompTIA Network+ | CompTIA | Earned
